Course Name	Course Description
Operational Leadership	Join NPS staff, Dan Watson, as he shares a 360 degree view of what and how to quickly assess hot-spots when planning and executing events of all types, on or off trail.
First Aid/CPR	Need to recertify? Looking to get certified? Learn what you need to know and what to do when injuries happen.
Chainsaw Safety	Situations requiring chainsaw use are inherently dangerous. Re-up or attain certification and practice techniques to keep you, and those around you, safe. Application required.
Building the Team	The future of the Trail depends on emerging leadership. Learn what's needed to be part of Mobile Skills Crew and chapter project teams.
Crew Leader Refresher	Most professions call this continuing education. We call it a refresher. Either way, share and learn with your peers to keep the fire stoked for another all-star season on-Trail.
Smart Tools	Join this session to learn how you can assist with trail development needs by taking a hike with your phone. Yes, it is sort of that easy.
Comfort Zones	Trail gatherings, like any social event, can be scary for newcomers and veterans alike. Join this session to learn about individual comfort zones, and how this awareness applies on and off trail.
Camp Chef	Those belly-filling and soul-replenishing meals don't magically appear under the big top at the end of the day; they take many hands and learned hours to plan, prep, cook, and deliver. Join us, and experts from the North Central Technical College Cullinary Institute, for a gut-check on safe meal preparation for large groups.
Three Tiers of Trail Construction	Trailbuilders have a unique kick-shuffle when they walk. They use their boots to kick out the berm on the critical edge, clear out the throat of a dip, or "finesse" the backslope. This session examines, and simultaneously crafts, 400 feet of Trail on multidimensional planes.
Boardwalk Construction	Is building 266 feet of elevated boardwalk and calling it "immersion training" just another way of getting more work out of you? Maybe, but either way, you will gain hands-on, multifaceted and transferrable skills and have fun in the process!
