

Wisconsin State Park - ColdCache Park Packs

Overview:

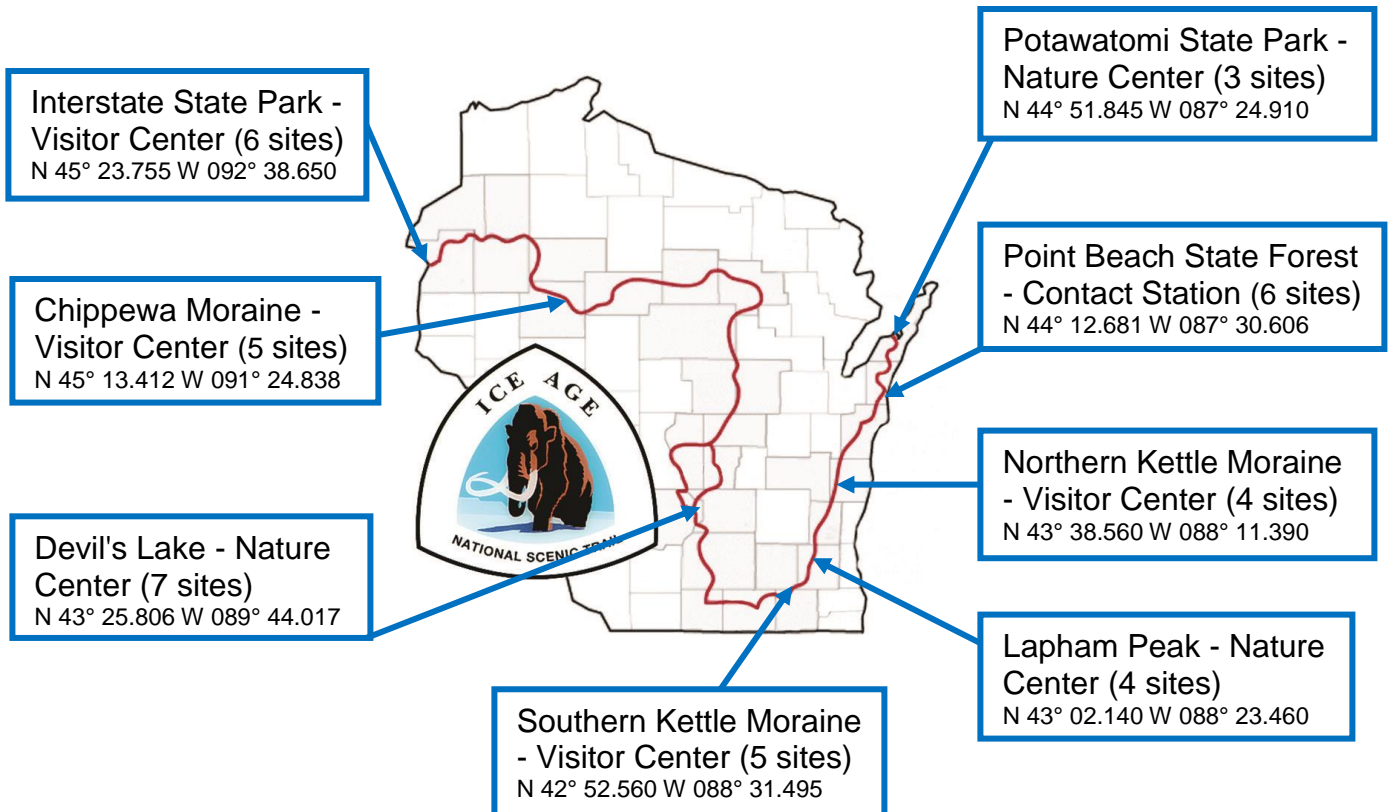

The Ice Age Trail goes through twelve (12) Wisconsin State Parks or Forests. Forty (40) ColdCache sites, plus three (3) cultural / additional sites are distributed in or near eight (8) of these state properties. ColdCache Park Packs can be checked out by visitors at these eight (8) locations. The Packs contain the site information and supplies needed to find the sites and learn about the ColdCache program.

Every pack includes a GPS unit. Each pack is then customized based on the activities required to complete the tasks for the ColdCache sites at that location.

These packs encourage families or other groups to be active in the outdoors. In the process, Park visitors learn how to use a GPS unit, get fresh air, exercise, and a geologic lesson while enjoying the thrill of finding a treasure and working as a team.
