THE HIKE

From its starting point at the STH-67 wayside, the segment continues along the west side of STH-67 for less than half a mile before crossing over to the east side of the road. The segment intersects (**WK16**) a spur trail leading up to Kettle Moraine State Forest—Southern Unit (KMSF-SU) Backpack Shelter 1. Perched atop Spy Glass Hill, the vista from the shelter area is of a flat plain left behind after water drained from Glacial Lake Scuppernong. Just past the spur to the shelter, a second spur trail leads to McKeawn Springs, which flow into a trout pond and Scuppernong Creek.

The segment crosses Piper Road and travels through hilly terrain. A short distance south of CTH-ZZ, the segment intersects a blue-blazed spur trail. Hikers can follow the spur to the KMSF-SU Scuppernong Trail network southside parking area. Shortly after crossing CTH-ZZ hikers will encounter another blue-blazed spur trail leading to the Scuppernong Trail network's northside parking area and trailhead, with restrooms and water. The segment heads east, parallel

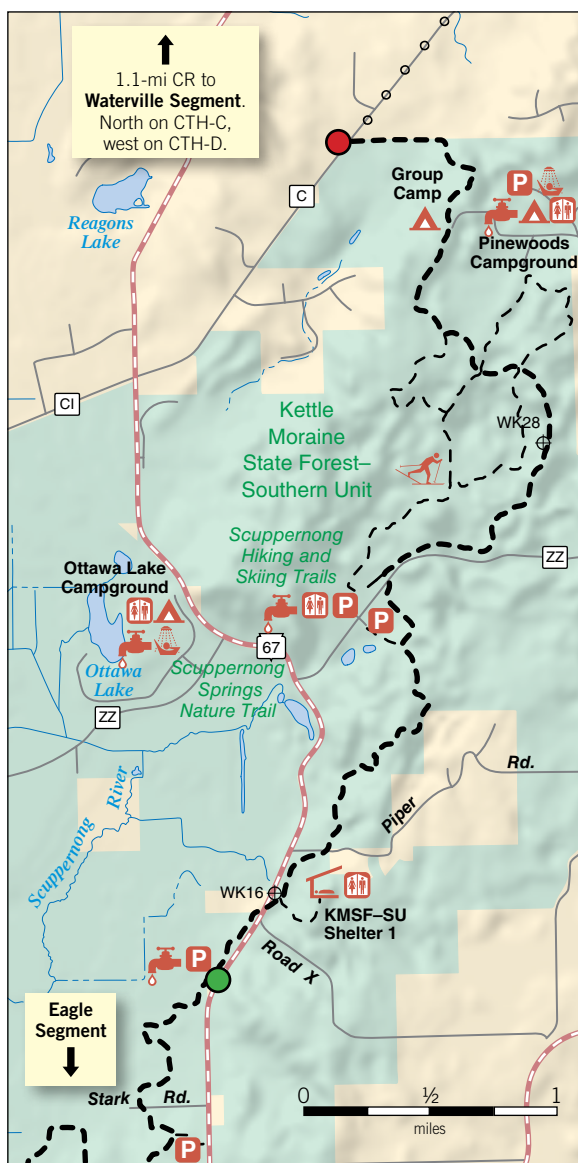

North of CTH-ZZ the segment traverses a roller coaster of hills set in hardwood forests among numerous trailside kettles. The segment reaches its highest point (1,075 feet) at a location (**WK28**) marked with a bench and crosses the Scuppernong skiing/hiking trail several times as it continues north and west. The segment passes through the KMSF-SU Pinewoods Campground (with access to water and restrooms), then bends to the west and makes its way to its endpoint on CTH-C.
