

My name is Glenn Wobick and I just finished section hiking the entire Ice Age Trail on Saturday 08/27/2022. I started on 03/25/2017 from Sturgeon Bay. This has been a surreal journey for me. It was about 3 years in total hiking days, 5 years in total. Today's hike In St Croix Falls had everything that you would experience on the trail, hiking on rocks, mud, fording streams, steep hills, town sections. I would recommend it to anyone that would like to experience the full trail to see if they would love it as much as I do. This trail has had my blood, my tears, my sweat, my successes and my failures. I've hiked in the cold, the snow, the heat, the humidity. I did the trail with a bike shuttle, but I think next time I will use the shuttle as the roads can be difficult to hike before or after a hike. I can't express how much I love this trail and plan on volunteering for the next year before I start it up again. I would really like to join the Alliance. I can not wait to restart the journey again and already miss being on the trail.
